PRIVATE HOSPITAL BENCHMARKING GROUP

Benchmarking is a process of measuring the performance, services and processes of a Hospital against other high standard Private facilities.

The purpose of benchmarking is to identify internal opportunities for improvement.

The Philosophy of the Private Hospital Benchmarking Group is "to help each other solve common problems" through systematic comparative data collection with follow up Meetings of participants to discuss findings and share methods for resolution of problems/issues identified. Networking and Education are the other key components of membership.
